INFORMATION REPORT

This Document contains information affecting the National Defense of the United States, within the meaning of Title 18, Sections 793 and 794, of the U.S. Code, as amended. Its transmission or revelation of its contents to or receipt by an unauthorized person is prohibited by law. The reproduction of this form is prohibited.

SECRET 25X1 SECRET 25X1 REPORT NO. DATE DISTR. 2 July 19: 25X1 NO. OF PAGES 2 25X1 NO. OF PAGES 2 25X1 NO. OF PAGES 3 25X1 IN SUBJECT Restock Marienehe Fish Combine REQUIREMENT NO. REFERENCES IN REQUIREMENT NO. REFERENCES IN REPORT ARE DEFINITIVE. IN APPRAISA OF COMBIN IS TENTATIVE. (FOR KET SEE REVERS) IN REPORT ARE DEFINITIVE. (FOR KET SEE REVERS) X1 C. Rostock was accomplished through wet dredging. The quay walls were built vertically as disbanded gravity-retaining-walls. Relived sidings leading into the main railroad net were available. The south quay of the harbor was sometimes used as a fitting area for chips built in the Neptun shipperd, but this information was only hearsay. X1 Pish were unleaded, carried into the shed _shown as Point 1 on Enclosure (A) for classification, and then loaded onto railroad ears for further transportation. 3. Workshops and warehouses were under construction. X1 ENCLOSURE (A) Sketch of Rostock-Marienehe Fish Combine	253
ATE OF INFO. THE SOURCE EVALUATIONS IN THIS REPORT ARE DEPINITIVE. THE APPRAISAL OF CONTENT IS TENTATIVE. (FOR KEY SEE REVESS) THE QUIRED Source evaluations in this report are Definitive. THE APPRAISAL OF CONTENT IS TENTATIVE. (FOR KEY SEE REVESS) X11. The harbor basin was built in 1950-51-52. Connection with the fairway to Rostock was accomplished through wet dredging. The quay walls were built vertically as disbanded gravity-retaining-walls. Railroad sidings leading into the main railroad net were available. 1. South quay of the harbor was sometimes used as a fitting area for ships built in the Neptun shipyard, but this information was only hearsay. X12. Fish were unloaded, carried into the shed fishous as Point 1 on Enclosure (A) for classification, and then loaded onto railroad cars for further transportation. 3. workshops and warehouses were under construction. Sketch of Rostock-Marienehe Fish Combine	253

Connection with the fairway to Rostock was accomplished through wet dredging. The quay walls were built vertically as disbanded gravity-retaining-walls. Reilroad sidings leading into the main railroad net were available. the south quay of the harbor was sometimes used as a fitting area for ships built in the Neptun shipyard, but this information was only hearsay. X12. Fish were unloaded, carried into the shed _ shown as Point 1 on Enclosure (A)_7 for classification, and then loaded onto railroad cars for further transportation. 3. workshops and warehouses were under construction. [1 ENCLOSURE (A) Sketch of Rostock-Marienehe Fish Combine	
The source evaluations in this report are definitive. The APPANSAL OF CONTENT IS TENTATIVE. (FOR REY SEE REVERSE) The harbor basin was built in 1950-51-52. Connection with the fairway to Rostock was accomplished through wet dredging. The quay wells were built vertically as disbanded gravity-retaining-walls. Railroad sidings leading into the main railroad net were available. It is south quay of the harbor was sometimes used as a fitting area for ships built in the Neptun shipyard, but this information was only hearsay. X1 2. Fish were unlosded, carried into the shed _ shown as Point 1 on Enclosure (A)7 for classification, and then loaded onto railroad cars for further transportation. 3	
X11. The harbor basin was built in 1950-51-52. Connection with the fairway to Rostock was accomplished through wet dredging. The quay walls were built vertically as disbanded gravity-retaining-walls. Railroad sidings leading into the main railroad net were available. the south quay of the harbor was sometimes used as a fitting area for ships built in the Neptun shipyard, but this information was only hearsay. X12. Fish were unloaded, carried into the shed _shown as Point 1 on Enclosure (A) _T for classification, and then loaded onto railroad cars for further transportation. 3
